**Importance:** Normal

Ari,

Attached please find a revised draft application (15 pages, including claims and abstract), and figures (4 additional pages, figures 1-5). This revised draft incorporates the inventors' comments. Specifically, we updated figure 5 (and corresponding text in the specification) to read generically on various types of control elements, and not only on a touch pad. We also updated the specification as you request, and made minor corrections to the claims (i.e., claim 15).

Please review the revised draft application and have the inventors do the same. Assuming all is in order, please have the inventors sign the attached declaration and assignment documents, and send the executed copies to us via express courier. We will then file the application as a new utility application in the U.S. patent office.

Also, please let us know whether you would like us to forward to the application to Mr. Scott MacKenzie (via overnight courier) in Canada, or whether you will take care of providing him with a copy of the application.

If you have any comments or revisions, please let us know so that we can make the appropriate changes. Please let me know if you have any questions, and we look forward to hearing from you soon.

Regards,  
Ross
